Market Update

Current Market Themes

- Geopolitics has overtaken U.S. macro fundamentals as the market's primary focus
  - Conflict in Iran has increased near-term inflation risks due to higher commodity prices
  - Unemployment rate remains stable with net new job creation near zero
  - Consumer spending and business investment continue to support growth, though momentum is slowing

- The Federal Reserve paused during both meetings in Q1, keeping rates at 3.50-3.75%
  - The median "dot plot" projection continues to show one 25 basis point cut in 2026, though individual projections showed less easing
  - Fed Chair Powell acknowledged the path forward is complicated by geopolitical uncertainty, making it more difficult for the Fed to balance its dual mandate

- Rising front-end yields unwound the inversion in the Treasury curve
  - Rate cut expectations were pushed further out, lifting front-end yields
  - Escalating Middle East conflict drove a spike in volatility
  - Credit spreads widened from historically tight levels amid heavy supply and geopolitical pressure

Market Pricing Conflict In Iran

- **Closure of the Strait of Hormuz creates a supply shock**
  - Higher oil prices pressure agricultural and industrial inputs
  - Duration of price shock more important than magnitude
- **Federal Reserve likely to remain on hold as it assesses evolving risks**
  - Headline inflation expected to rise though uncertainty remains regarding passthrough to core inflation and labor markets
  - Fed to look through supply-side energy shock if inflation expectations remain anchored

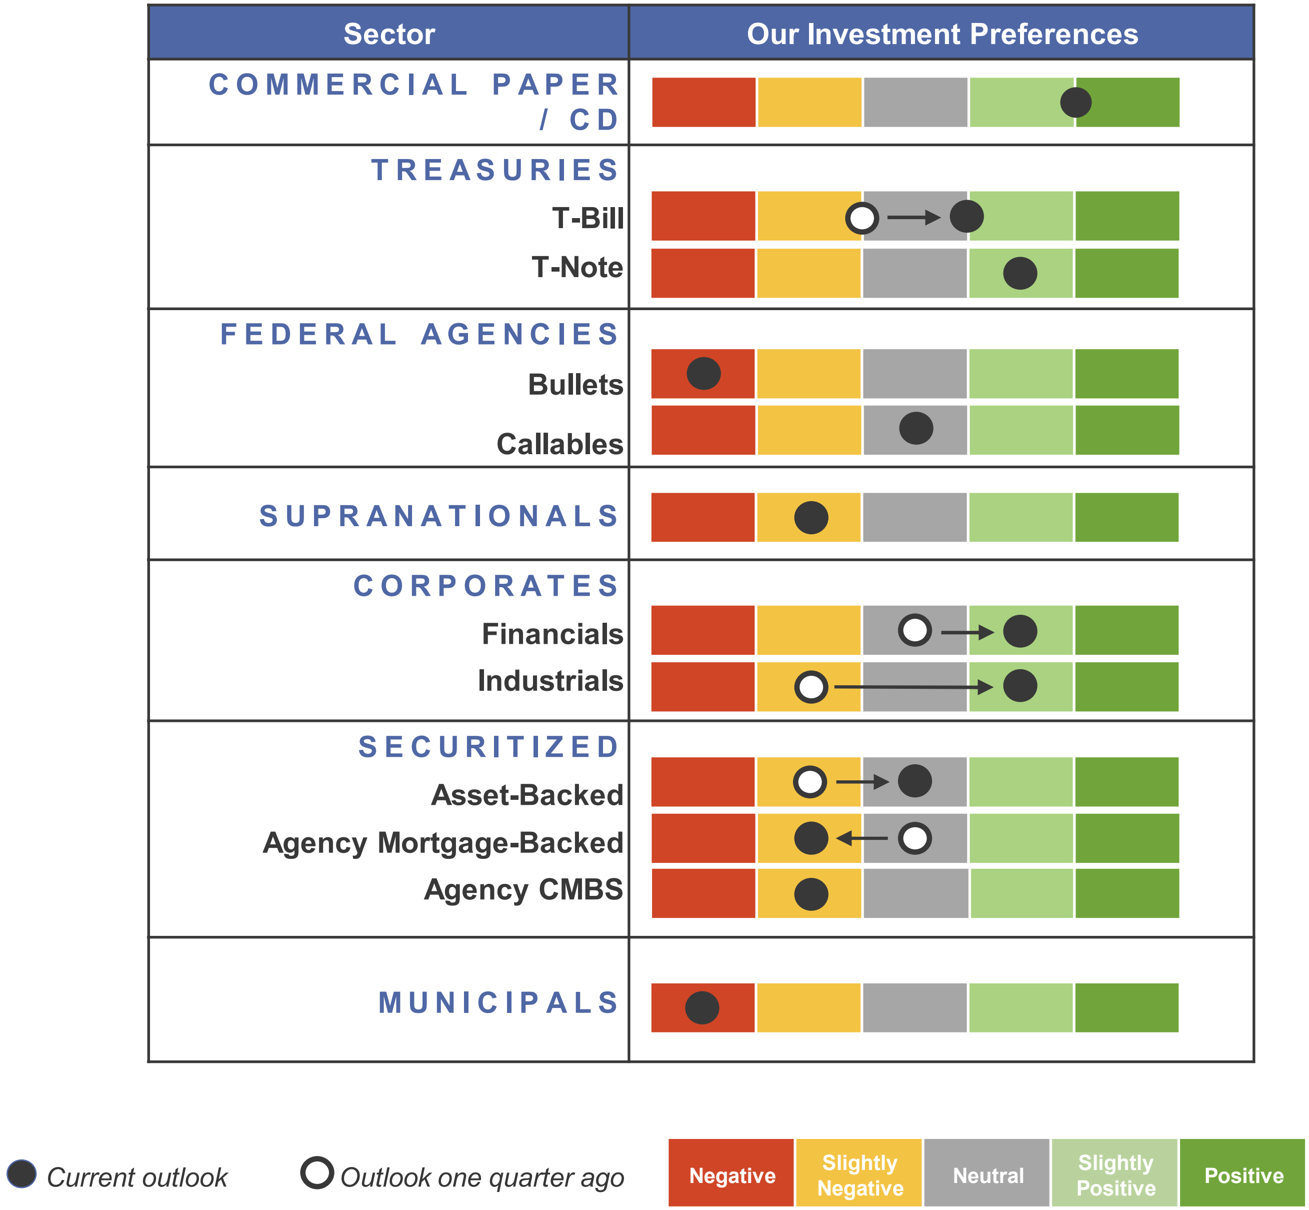
Fixed-Income Sector Commentary – 1Q 2026

- The **Federal Open Market Committee (FOMC)** maintained the target range for the federal funds rate, noting continuing challenges to achieving its dual mandate of maximum employment and stable prices.
- **U.S. Treasury** yields rose across the curve with 2- to 5-year tenors experiencing the largest repricing. The short-end curve inversion ended given the move higher in yields.
- **Federal Agency & supranational** issuance remained limited, keeping spreads narrow and excess returns muted. The announcement of $200 billion of mortgage purchases by FNMA and FHLMC is unlikely to materially affect issuance trends with buying funded by cash.
- **Investment-Grade (IG) corporate** bond yield spreads were stable in the first two months of the quarter. However, in response to geopolitical tensions, heightened issuance, and concerns over private debt capital in the last month of the quarter, spreads widened noticeably. Excess returns for the sector were generally negative, but strong carry is expected to provide support.
- Spreads on **Asset-Backed Securities** widened marginally, but spreads versus equivalent-duration corporate notes narrowed. Auto loan collateral marginally outperformed credit receivables.
- 30-year **Agency-backed mortgage-backed securities (MBS)** generated solid excess returns in Q1 and outperformed 15-year tenors. Surging bond volatility toward quarter end neared weighed on excess returns. **Agency-backed commercial MBS (CMBS)** also produced positive excess returns for the quarter.
- **Short-term credit** (commercial paper and negotiable bank CDs) experienced spread widening which created opportunities, particularly in 9- to 12-month tenors. Floating-rate notes also saw notable spread widening, ending the quarter 10 to 15 bps wider versus year end levels.

Fixed-Income Sector Outlook – 2Q 2026



Factors to Consider for 6-12 Months

Monetary Policy (Global):

- The Fed held rates steady in Q1 amid persistent inflation pressures and limited net job creation.
- Policymakers acknowledged the path forward is complicated, with geopolitical uncertainty adding additional strain to the Fed's dual mandate.
- The "dot plot" projects 25 bps of rate cuts in both 2026 and 2027; however, this is predicated on inflation progress.
- Global central banks remained on pause in Q1 but energy inflation pressures may necessitate hikes.

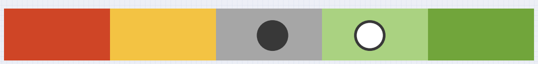
Economic Growth (Global):

- Stable consumer and business spending support growth, offsetting the weakness seen from the U.S. government shutdown in Q4 GDP.
- Fiscal support and AI investment should aid growth; however, a prolonged conflict in Iran may weigh on consumer discretionary spending.
- Risks to global growth prospects have increased amid the escalating conflict due to higher energy prices, supply-chain disruptions, and increased uncertainty.

Inflation (U.S.):

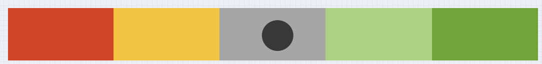
- The inflation outlook depends on the duration of the Middle East conflict and the degree to which higher energy and commodity costs raise core goods and services prices.
- Inflation remains sticky with limited progress on core services and continuing pressure from tariffs passthroughs.
- Near-term inflation expectations have increased due to the higher energy prices while long-run expectations remain anchored.

Financial Conditions (U.S.):



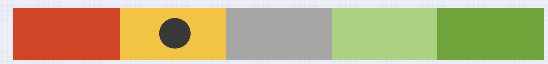
- Corporate fundamentals and underlying demand remain strong. Spread widening has improved valuations, though the sector is still rich from a historic perspective.
- The conflict in the Middle East has tightened financial conditions. The duration of the conflict and its impact on the economy will be a key driver of corporate fundamentals.
- Geopolitical conflict, higher oil prices, and the evolution of the economy are key risks. At this time we view volatility in private credit as contained and not a systemic risk.

Consumer Spending (U.S.):



- Modest job growth and inflationary pressures continue to weigh on consumer sentiment. Higher energy and food prices will likely drive consumer sentiment lower.
- Wage growth continues to exceed inflation, but this gap has narrowed. Energy shocks may compress real incomes and reduce discretionary spending.
- Lower-income cohorts remained more exposed to higher energy prices as a larger share of household budgets are allocated to essentials.
- Higher-income cohorts benefit from strong equity markets and home price appreciation in recent years.

Labor Markets (U.S.):



- Labor market conditions continued to cool with net new job creation close to zero.
- The unemployment rate remained unchanged as lower job creation was offset by a reduction in the pace of labor force growth.
- The Fed has framed the combination of limited job growth and a stable unemployment rate as an uncomfortable balance.
- Initial jobless claims and layoff rates remain low, consistent with a continued "low-hire/low-fire" environment.

This resulting net change in account value is then annualized by multiplying it by 365 and dividing the result by 7. The yields quoted should not be considered a representation of the yield of the fund in the future, since the yield is not fixed.*

PFMAM professionals have exercised reasonable professional care in the preparation of this performance report. Information in this report is obtained from sources external to PFMAM and is generally believed to be reliable and available to the public; however, we cannot guarantee its accuracy, completeness or suitability. We rely on the client's custodian for security holdings and market values. Transaction dates reported by the custodian may differ from money manager statements. While efforts are made to ensure the data contained herein is accurate and complete, we disclaim all responsibility for any errors that may occur. References to particular issuers are for illustrative purposes only and are not intended to be recommendations or advice regarding such issuers. Fixed income manager and index characteristics are gathered from external sources. When average credit quality is not available, it is estimated by taking the market value weights of individual credit tiers on the portion of the strategy rated by a NRSRO.

It is not possible to invest directly in an index. The index returns shown throughout this material do not represent the results of actual trading of investor assets. Third-party providers maintain the indices shown and calculate the index levels and performance shown or discussed. Index returns do not reflect payment of any sales charges or fees an investor would pay to purchase the securities they represent. The imposition of these fees and charges would cause investment performance to be lower than the performance shown.

Some, but not all assumptions are noted in the report. Assumptions may or may not be proven correct as actual events occur, and results may depend on events outside of your or our control. Changes in assumptions may have a material effect on results. Opinions and data presented are not necessarily indicative of future events or expected performance.
