

Hayward Garden in a Day Lawn Transformation Project Details

WHO | Anyone & Everyone!

WHAT | Hayward Garden in a Day Lawn Transformation Project

WHEN | Saturday, April 15, 2017 at 10:00am

WHERE | Downtown Hayward, City Hall near BART Station (Montgomery St.)

WHY | On April 15th, we will be converting 5,000 sf of lawn into a bay-friendly garden outside Hayward City Hall....Lawns require large amounts of water and maintenance - a California native garden uses less water, provides bird and pollinator habitat, requires less maintenance than grass, and promotes healthy soils by retaining water and improving drainage.

Join us on Saturday, April 15th and learn how to sheet mulch, install drip irrigation, plant native landscaping, use compost and bark mulch or just stop by on your way to/from BART to say hello and check out our repurposed bench and seating area!

This event is free and all tools and resources will be provided on the day of the event.

This Bay Friendly Landscape Project is a community partnership with the Keep Hayward Clean and Green Task Force, Earth Team, Waste Management, Alameda County Waste Management Authority, and the City of Hayward. For additional information, please contact Todd Rullman at 510.881.7746.
