

General Comments

Which public benefits do you care about the most?	Are there any other public benefits the City should consider?
Open space (5)	Performing arts center for low income/at risk youth (free or reduced cost)
Trails (4)	Facility/shelter for homeless
Parks (2)	Area to bathe, give out personal care and toiletry products
Infrastructure (2)	Or facility for job placement for homeless
Community development	Child development after school programs/building
maximize open space	Impact on schools (HUSD) include improvements or replacements
minimize development	Connections to complete streets plan, bike pathways and pedestrian safety
off leash dog areas!	What schools will all these folks be going to? - Current schools are old and overcrowded already - No charter schools! That decreases our property values!
Sustainable student housing	Set aside housing for our senior citizens and veterans!
move Adobe homeless low income housing to area	Families do not move into a community with good charter schools. They move for great <u>public</u> schools. Make sure our schools are ready to serve new families!!
Affordable housing (2)	
Affordable housing and ensure that anti-displacement measures are prioritized	
public landscaping watered and cared for	
Development in some areas for housing and commercial, while maintaining some open spaces and trails.	
Improve community and value to area	
Inclusionary Housing Program - set aside units for city employees, police, teachers, etc. so they can live in the community they work	
We want to make sure that development of property has good access to walking to Mission Blvd and transit - Estel AC Transit	
Creek	
Trees!	
Public transportation	
Improve our schools	
Housing for teachers	
Develop half of the land, but leave the rest as parks and open space	
Increasing safety. Nothing that increases crime.	

Q1: Where are you from?	Q2: How did you find out about the meeting?	Q3: If you live in Hayward, which neighborhood are you from?	Q4: What characteristics of the neighborhood do you like most?	Q7: What are the challenges your neighborhood faces today?	Q9: Have you found today's presentation informative?	Q11: How would you like to be informed for the second public meeting?	Additional Comments
San Lorenzo	Word of mouth (2)	Highlands College Heights	Heart of the bay	City is not responsive to our needs, outdated over 3 years for future needs/policy updates.	Info on slides on website	Text message	How use of knowledge? Would like that meeting to be broken into two groups- Parents (10 and 20-30 min) and the teachers (10-15 min) and the students (10-15 min).
San Leandro	Multiple methods		Quiet, diversity, views and access to nature, not near large highways/interstates.	Parking (2)	Affordable housing	All of the above. All ways of communication.	Only received notice of meeting 2 hours prior to it starting. Please provide timely notice.
San Jose	Email from friend		Can walk to many services and shops	Signs	Hard to hear speaker and see slides.	LSPC. Have been on email list since January 2018 and heard nothing.	Sounds like a "Store day"
	Peer (2)			Threats to cohesiveness	Information but hard to see and hear!	Rides call, rides lead, city council members, walk their districts and touch the constituents.	Program for humane treatment of wildlife being in Green/Grey sections (Best cats, turtles, ferrets, squirrels, deer, etc). Removal of hazardous materials. Mitigation of increased traffic. Beers carts to come to neighborhood. Provide for safety of school children walking to and from elementary school. Working City of P to allow emergency vehicle access.
	Social, friends, Best Home School program			Shopping (2)	For Food/Grocery why rental units on the sale?	Like with colleges and other organizations, subscribe to a text message generator for upcoming events and meetings.	For questions I have created an option. Instead of 4, for the attendees I suggest letters to City via contacting but I guess for the citizens I make sense.
	By chance			Heavy traffic and parking issues, congestion, homelessness, lack of open space, bad air quality and severely rutted road. Drive Way - no sidewalks or usable bike lanes.	What is affordable? Not parking, school?	Poster/Sign in English and Spanish.	More homes + more traffic, longer commute times, changed roads, more fuel used, more pollution, etc. More fuel used more is needed.
				Prioritizing public benefits	Earlier this year the city said that the community would have an opportunity to get involved in the development of the 200 parcel group. When and how can the community get involved in development planning on Parcel group 2, 3, and 4? Bruce King, Friends of San Lorenzo Creek, bruceking@gmail.com		Totally love the key packet!
				Threats to cohesiveness	Very general. Most info already publicly available.		Comment on 8/17: The meeting had been scheduled closer to the parents, we wouldn't have had as much.
				Highland Area needs more public transportation such as bus services, more frequent	Couldn't see very well - larger screens would help - AASPC in Pleasanton can get you one (201-426-1640)		Please reconsider your meeting and parking process. You have a huge "Shouldn't City have that a closer to all properties under discussion. You chose a bus-stall venue that was too far from the neighborhood to allow for walking or public transportation. There is time parking here and not walking on my way to answer these questions.
					Doing at back side. Slides too small to read. Microphone volume should be lower. Screen could be much larger and better sound and bigger screens, using video display a projector.		Improve meeting attendance demographics by providing childcare or separate child-friendly meeting. Signify who ADA compliance.
					Was at back of room. Hard to hear and see screen.		City should respect neighborhood communities. Increase production space for community engagement, redevelopment needs to be done with the future in mind for changes in transportation needs and hopefully public transportation.
					Site for meeting should be in back places, near the parcel involved. Need a sign with plenty of parking.		Hi! I heard you "market housing", "housing", etc. How about recreation such as water park, amusement park, sports park? Or shopping, such as outlet stores?
					More emphasis on environmental impact, impact on creek.		How do we plan to improve traffic?
							Is it possible to get here, impact on vehicles, plan for San Lorenzo (school) since already moved.
							Our changes (recreation) Theater would be the same site.
							Would like to see my bike lane - need more public transit focused on bike because no rideable options.
