

# RECYCLING MANDATES

## ORDENANZAS DE RECICLAJE

State law and local regulations require that businesses implement separate collection of recyclables and organics. Businesses that regularly generate organics, including grocers, restaurants, food processors, florists, and some convenience stores, are also required to arrange for separate organics collection.

To implement the law, the City Council opted to participate in a Mandatory Recycling Ordinance approved by the Alameda County Waste Management Authority (Authority).

Collection of recyclables is available from your service provider, Waste Management, at 20% of the comparable garbage rate. Organics collection is available at half the rate of comparable garbage service. Carts or bins for outdoor storage of recyclables or organics are also available.

### PROPERTY OWNERS MUST:

- Ensure that your tenants have the required services
- Subscribe to the applicable collection services
- Provide indoor containers for temporary storage, as well as signage on or near those containers
- Annually provide collection requirements to tenants, employees and contractors.

The recyclable and organic materials must be placed in the designated outdoor containers. Please do not place these materials in Waste Management's green metal trash bin or burgundy cart.

RECYCLING ONLY

TRASH ONLY

ORGANICS ONLY

Printed materials available at no charge include labels for your containers and posters for reference by employees or patrons.

Grant funds may be available (up to \$500 per business) to buy indoor containers for separate storage of organics. The link to the application is here: <http://www.recyclingrulesac.org/containers/>.
