

Demolition Drawing

City of Hayward Development Services Department

2016 Update

Permits are required for the demolition of any structures attached or detached from the property. A demolition permit is an over the counter permit. When obtaining a demolition permit at the Permit Center, bring in a site plan showing the location of the residence/building and the location of the structure to be demolished. Please make sure the drawing is to scale. Additionally, please check to see if your project requires a J number through Bay Area Air Quality Management District.
